SUMMARY

Result-oriented Software Developer with 6 years of experience developing high-performance applications. Expert in modern architectures using Next.js, TypeScript, and Supabase. With a proven track record in the financial sector delivering secure, scalable systems. Strong focus on technical leadership, clean code, and mentorship, fostering a culture of excellence.

EXPERIENCE

Principal Software Developer

CAW TECH

Sept 2025 - Present

Tucuman, Argentina

- Led technical and architectural development of digital products using Next.js, TypeScript, and Supabase.
- Volley Manager: Spearheaded development to optimize real-time data flows and large-scale sports administration.
- CAW Education: Led the creation of an EdTech ecosystem designed to humanize academic data, optimizing administrative workflows and allowing educators to focus more on student-to-teacher interaction through robust, future-proof technology.
- ExpoLogic: Engineered a dynamic resource allocation engine for this fair management system, automating exhibitor logistics and reducing manual operational overhead by 50%.

Software Developer

CENSYS

Dec 2023 - Jun 2025

Tucuman, Argentina

- Implemented banking modules using PowerBuilder and SQL, managing stored procedures, table performance, and large data volumes, collaborating closely with QA, business stakeholders, and technical leaders, in Agile/Scrum environments.
- Improved system performance by 60% for critical requirements related to payments, reporting tools, and data queries.
- Appointed as Technical Tutor for new developers, accelerating their onboarding and team integration by 30%.

Front-End Engineer Intern (Web UI)

GLOBANT

Jul 2024 - Oct 2024

Tucuman, Argentina

- Developed responsive web interfaces using React.js, TypeScript, TailwindCSS, and Zustand.
- Optimized UI components, effectively reducing load times by ~20%.
- Collaborated in agile environments (GitHub Projects) to deliver features focused on accessibility and performance.
