PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 5+ years building software across modern web applications, B2B/SaaS products and enterprise systems. Strong focus on TypeScript, React, Next.js and Node.js, complemented by SQL/backend engineering and experience modernizing enterprise and banking systems. Combines product engineering, technical ownership and architecture decisions with measurable impact in production.

PROFESSIONAL EXPERIENCE

Principal Software Engineer · Co-Founder

Sep 2025 — Present

CAW Tech · Argentina · Remote

- Own technical direction, system architecture and end-to-end delivery of CAW Tech products — architecture decisions, software design, integrations, database/backend choices, frontend architecture, deployment and product evolution.
- Volley Manager: led architecture and end-to-end development of a production SaaS/PWA powering daily operations of a professional volleyball club in Bolivia — 700 athletes, 15 staff and 600 daily access/check-in events.
- Built administrative, financial, attendance, notification and access-control workflows (QR and consent-based facial recognition), plus online registration and payment integration with Banco Económico (Bolivia); designed interactive volleyball scouting, AI-assisted club information and a voice-based scouting workflow for coaches.
- ExpoLogic: architected and developed a multi-tenant event-space SaaS enabling organizers to generate event websites, manage exhibitors and reservations, and configure spatial layouts through a visual map builder with interactive stand selection.
- Presented the ExpoLogic MVP at Emprende U (semifinalist); product subsequently featured by La Gaceta. Designed CAW Education, a data-driven education platform for schools.

Software Developer · Banking

Dec 2023 — Jul 2025

CENSYS S.A. · Argentina · Remote

- Maintained and adapted existing banking modules for Sucrédito Bank (BSR) and Banco Santiago del Estero (BSE), implementing requirement changes and protecting transactional integrity in high-volume production systems.
- Designed and tuned stored procedures, triggers and SQL (Sybase / T-SQL) for stability and performance — up to 60% faster execution on financial reporting workloads.
- Integrated SOAP APIs, validated with Postman, supported UATs and handled post-deployment incidents across business-critical banking flows.
- Implemented a hardware-assisted credit-card statement payment flow: operators scan the statement barcode with a reader, the system matches the records automatically, and payment of the credit-card summary is managed from there.
- Mentored new developers through onboarding across technologies, Scrum practices and team workflows — connecting day-to-day development with the tech lead and QA/testers.

Front-End Engineer Intern · Web UI (SSR)

Jul 2024 — Oct 2024

Globant · Yerba Buena, Tucumán · Remote

- Selected for a competitive internship program among 500 professionals, completed alongside my full-time role at CENSYS (outside CENSYS working hours).
- Built React, TypeScript and Zustand applications in Agile teams, improving UI rendering and lifecycle practices and reducing initial load times by 20%.
- Participated in Git/GitHub workflows, code reviews and frontend architecture discussions.

Full Stack Web Developer · MERN

Jan 2023 — May 2024

TecnoLine · Tucumán · Hybrid

- Owned end-to-end delivery of 12+ production web apps (e-commerce, SPAs and admin systems), including a period of concurrent work alongside CENSYS.
- Integrated APIs, payment gateways and external services; treated SEO, accessibility and PageSpeed as first-class concerns.
- Managed the full lifecycle on Vercel/Render with ongoing client support.

Front-End Web Developer

Jun 2021 — Dec 2022

Freelance · Argentina · Remote

- Designed and built websites for entrepreneurs and institutions, including hosting deployment, maintenance and commercialization of reusable templates.

TECHNICAL SKILLS

Core: TypeScript · JavaScript · React · Next.js · Node.js · SQL · PostgreSQL · Tailwind CSS · shadcn/ui · Zustand · PWA

Backend & Data: Express · REST APIs · Supabase · MongoDB · Redis · T-SQL · Sybase

Engineering: Architecture · Product Eng. · API Design · DB Optimization · Git · CI/CD · Testing · TestSprite · Playwright · Scrum

Domain: SaaS / Multi-tenant · Enterprise Systems · Legacy Modernization · Banking · PowerBuilder

Languages: Spanish (Native) · English (C1)

EDUCATION

Information Systems Engineering (in progress)

Mar 2022 — Present

Universidad Tecnológica Nacional (UTN) · Argentina

Graduate Diploma · Data Science for Organizations

Apr 2025 — Dec 2025

Universidad Nacional de Tucumán (UNT) · Argentina

International Program · Digital Companies & E-Business Revolution

Jul 2025 — Aug 2025

California State University, Northridge (CSUN) · USA

SELECTED CERTIFICATIONS

Cloud Computing · AWS · Coderhouse, May 2025

Business English · CSUN, 2025

Management and Processing of Organizational Data · UNT, Oct 2025
